leetcode.com/u/santhosh38 | Tamil Nadu, India

## Professional Summary

Computer Science undergraduate with strong fundamentals in Java, object-oriented programming, and data structures, and hands-on experience building scalable, low-latency web applications. Proven ability to contribute across the entire software development lifecycle, write clean and testable code, and optimize system performance. Seeking a Software Developer role to build high-availability, mission-critical systems.

## Technical Skills

**Programming Languages:** Java, JavaScript (ES6+)  
**Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Bootstrap.  
**Backend:** Spring Boot, REST APIs, MySQL  
**Tools:** Git, GitHub  
**Core Concepts:** Object-Oriented Programming, Data Structures & Algorithms, Modular Design, API Optimization

## Internship Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                 |
