PROJECTS

1. ONLINE WEB GAMES:

Developed a web platform with games focused on aptitude and technical questions to help students prepare for interviews.

In this project, I used Html , CSS and JavaScript as Front end and PHP as Backend and MYSQL as Database.

2. MEDICAL CHATBOT USING ML:

Created a chatbot using machine learning techniques to assist users with medical inquiries. If a patient is Suffering from a fever this bot will help to suggest the tablets before consulting a doctor.

In this project, I used Html, CSS and JavaScript as Front end and in python the Flask as Backend and YAML as a Database.

It includes RASA framework is to communicate with a bot and a user.

3. RESTAURANT MANAGEMENT SYSTEM:

A Full Stack Python Restaurant Management System (RMS) uses Django for the backend and React.js for the frontend to manage restaurant operations. It handles menu management, order processing, reservations, inventory, and payments.

Customers can place orders and leave feedback, while staff manage orders and track inventory. It provides a secure, scalable solution for efficient restaurant management.
